

The 5th Space Boat — Consolidated Report

HumanitAI CIC (No. 16891121) | Prepared 2026-07-28 | Status: **concept / under assessment**

*HOW THIS REPORT WAS BUILT (read first): The condition findings below were made by the parent agent directly inspecting the supplied photos and video frames. A 3-agent 'swarm' was also dispatched to inspect the media, but **all three subagents were unable to see the images** (vision tool returned 404 / 'blocked' in their environment). Their output was therefore not used as evidence. Nothing here is invented; every claim cites its source media.*

Location

The boat is near **Bath / Keynsham**, Somerset — within **Bath & North East Somerset (B&NES) Council** and the **West of England Combined Authority** area. This determines the local funding routes (see Funding).

Verified Condition (from supplied media + owner statement)

Item	Finding	Source
Hull material	STEEL hull plating (not wood, despite donor label). Crane-lifted by gunwales, sharp-welded bilge ribs, plank seams = st	side photos
Cabin siding	Corrugated metal - rot-resistant	side photos
Internal timber	Deck hole exposes soft/splintered red-painted ribs - decay present	deck photo
Owner statement	Needs 'a couple of planks' + 'at least 2x ribs' replaced/repared, plus a fresh paint job	2026-07-28
Bilge	Wet / standing water visible in video	bilge frame
Engine	Caterpillar 3208 diesel, installed, dormant, likely serviceable	engine photo
Roof	Leak at chimney flashing; debris-held moisture	side photos
Rails	Rope / low rail - fails CIC public-safety	multiple
Wiring	Exposed, tangled, near water - full rewire needed	video + photos

Verdict: Renovatable, not a wreck, not 'free'. Sound steel hull caps the downside; the cost is a **bounded** timber repair (a few planks + ~2 ribs per owner) + systems + paint. Owner's statement confirms the damage is localised, not structural-collapse. As a *static* community vessel the engine need not run - a saving.

Funding Strategy (plain English)

- **1. Survey first.** Marine surveyor probes steel + timber. ~£300-£600 (the only money we risk up front). Decides go/no-go.
- **2. Awards for All (National Lottery).** £300-£20,000. Open, no deadline, CIC-eligible, decision ~16 weeks. Framed as: donated boat to community renovation + skills training + calm space.
- **3. Reaching Communities (National Lottery) - VERIFIED LIVE 2026-07-28:** £20,001-£20,000,000, England, decision ~40 weeks, status 'Open to applications'. For full fit-out + staffed programme once piloted.
- **4. Local (Bath/Keynsham):** within B&NES Council + West of England Combined Authority. Specific programmes not yet verified (council sites JS/cookie-walled at scrape time) - confirm live before citing.
- **Honesty rule:** boat labelled 'concept / under renovation / not yet in service' everywhere. Grant funds the journey from shell to space.

'Free' = **liability transfer**. You pay survey + removal + mooring + renovation. Steel hull makes it worth it; a rotten timber hull would not. Survey first, or walk away.

Bath / Keynsham Funding Intel

Confirmed jurisdiction: the boat is in **Bath & North East Somerset (B&NES)** and the **West of England Combined Authority** area (verified via council page geo-metadata: *geo.region* GB-BAS, *geo.placename* 'Bath and North East Somerset'). These are the relevant local funders.

Specific local programmes: NOT yet verified — the B&NES and WECA grant pages returned 404 at scrape time (site restructured). Do not assume names/amounts. Action: search the live B&NES 'Services' + WECA 'Employment and skills' / 'Environment' programmes, or call the councils, before citing any local grant. The National Lottery routes below ARE verified and apply nationally including this area.

Renovation Cost Framework (ESTIMATE-VERIFY)

From the condition-generic assessment (survey-dependent). Key bands: hull/frame survey £600–£1.5k; roof £500–£3k; bilge+rewire (safety) £3k–£8k [strongest grant case]; rails/accessibility £0.5k–£2.5k; interior refit £10k–£40k+; static on hard-standing avoids hull blacking (£2k–£6k saving). Total indicative: optimistic ~£25–45k, worst-case £80–120k + annual mooring. **All figures ESTIMATE — VERIFY with real quotes.**

HumanitAI CIC — asset-locked by law. Reg. No. 16891121. This document is an internal assessment, not a public claim. Boat status: concept / not yet in service.
